About Me

I'm an 18-year-old website developer based in Bangladesh with a strong passion for creating dynamic, user-friendly websites. Specializing in front-end and back-end development, I have hands-on experience with HTML, CSS, JavaScript, and modern frameworks like React and Node.js.

Driven by curiosity and a love for technology, I'm constantly expanding my knowledge to stay ahead of the latest trends and tools in web development. My goal is to build websites that not only function smoothly but also deliver an exceptional user experience.

When I'm not coding, I enjoy exploring new development techniques, collaborating on open-source projects, and working on personal web development challenges. I'm always excited about new opportunities to grow, learn, and contribute to the web development community.

Feel free to reach out if you have a project in mind or just want to chat about web development!

Skills
